

Accept Credit Card Payments
Using Your Smartphone With The

First Data Mobile Pay™ Solution

Now you can offer your customers fast, safe and flexible payment processing anywhere you have wireless coverage.

Turn your Smart Device into a Point-of-Sale Terminal

How it Works

If you need to accept credit cards while on the go, you need a payment solution that's as mobile as you are. Just download the application from the App StoreSM or Google PlayTM, plug the handy encrypting card reader device into your mobile device, and slide your customer's credit card to capture a sale.

Built in Security

Even if your transaction volume is low, you still need to handle card information in a safe manner. With First Data Mobile PayTM, your customer's card data is safe, because the numbers are instantly encrypted and card data is never stored on your smartphone.

Features

- Compatible with AndroidTM, iPhone[®] and iPad[®] mobile devices
- Support for all major credit cards
- Real-time processing and reporting
- E-receipt delivered to customer's e-mail

Contact customer service at the number on this statement for more information.
